Introduction
During this 24-hours assignment, we will evaluate your frontend web development skills using React.

Assignment:

https://www.figma.com/file/3xZuJJSXZdmVZonhWXcdJk/Untitled?node-id=0%3A1

Create a chat interface between corporate and student
Task is divided into 3 components:
- Create a full screen chat interface for mobile view
- Create a chat interface for desktop view (similar to internshala)
- User can either share a file as attachment or write a message

Follow the UI design for context.
For this assignment, you have 24-hours to build a pixel-perfect chat UI interface.

Evaluation criteria:
- UI
- Responsiveness
- Functionality

Note:
- 24-hours may not be enough time to complete the entire assignment perfectly. You will be evaluated based on your performance and other applicants' performance. Good luck!\

- No APIs will be provided. Please embed any node API in your implementation.

- You need to deploy your solution on a free hosting website and submit the link on internshala before the 24-hours are up.
